Automatic Thermal CD/DVD
Printer*

Automatic Thermal CD/DVD Printer

Designed and manufactured by Verity Systems, the CopyDisc Autoprinter includes a Rimage Thermal Printer, and for ease of use a 100 Mbyte Zip drive for image transfer. The CopyDisc Autoprinter is standalone, no PC is required for operation, simply create your image using the design software supplied with the CopyDisc Autoprinter. Using the print to file feature your finished image can be transferred to the printer via a Zip Disk. The easy to use integral control panel allows you to select the required file and the number of CD's to be printed.

The low cost thermal ribbon can produce 500 colour images, or using a single colour ribbon, 1500 mono images can be produced. With a printing speed of around 1 minute per disc the CopyDisc Autoprinter can produce approximately 120 discs in two hours for the colour ribbon, and 30 seconds for black mono printing. Mono printing can produce 120 discs per hour. In this mode the autoprinter is exceptionally cost effective at approximately £0.045p per disc.

CopyDisc Autoprinter

Automated Thermal CD/DVD Printer

Specifications
