

**Packs CD Jewel
Cases Quickly**

**Up to 800 cases
per hour**

CDs and DVDs

**Jewel Cases &
Slim-Line Cases**

Table-Top Unit

**Easily
Transportable**

NEW

The brand new **VS650 CD Packer** from Verity Systems is a semi automatic machine for packing CDs and DVDs into regular jewel cases and slim-line jewel cases. Not only does the CD Packer place the CDs and DVDs into the waiting case, but it will also place accompanying booklets.

Operation of the CD Packer could not be simpler. An opened jewel case is placed onto the work table. The automatic arm then lifts the CD and the booklet and places them accurately into the open case.

The cost and time savings are enormous. Up to 800 CDs can be packed per hour, a fraction of the time taken to pack jewel cases hand.
