Easy to use

The CopyDisc 7P is very easy to use, with all command operations being entered via the control panel. Your CopyDisc duplicator will not only automatically detect the type of CD/DVD Master (CD ROM, CD-XA etc) with out any user intervention, but will also provide "frame accurate" Data and Audio including UPC, ISRC and audio indexes. In addition, the compare master and compare copy modules allow both CDs/DVDs and images to be verified for complete data integrity assurance.

*The CopyDisc 7P
Automatic Duplicator & Thermal Printer*

Automatic CD-R/DVD-R Duplicator and Thermal Printer

The new CopyDisc 7P from Verity Systems provides the perfect solution to those wanting to produce CD-Rs/DVD-Rs to the highest standard that can equal the quality of the major professional CD/DVD producers. Combining the proven technology of the Rimage Perfect Image Thermal Printer and the Verity Systems range of CopyDisc automatic duplicators, users are assured of quality CD-R's/ DVD-R's printed with colour text and graphics.

The automatic operation is simple and effective enabling unskilled personnel to easily operate the entire process. Up to 220 blank CD-Rs/DVD-Rs can be loaded onto the machine. All command operations are entered via a user friendly control menu. The CopyDisc 7P incorporates as standard a 20 Gigabyte hard drive providing ample storage for data and graphics. If required additional hard disk capacity can be provided with the option of installing up to 40 Gigabytes of storage. The latest technology has been used providing easy 'plug and play' operation and high performance CD-R writers to speedy transfer of data to the CD-R. The CopyDisc 7P supports all current CD formats for audio, video and data to 'Book' standard.

Up to 7 writers can be installed which makes the CopyDisc 7P one of the most efficient automatic duplicators available, for example up to 62 CD-Rs (650MB/74minute) per hour can be duplicated and mono printed.

Fitted with the Pioneer A05 General Media DVD-R writer, the CopyDisc 7P can duplicate up to 7 DVD-Rs in 15 minutes at 4x. For full authoring DVD-R duplication, the Pioneer DVR S201 writer can be fitted. The CopyDisc 7P can be fitted with a combination of DVD-R and CD-R writers.

The CopyDisc 7P utilises a low cost thermal ribbon which can produce 500 colour images. Alternatively if a single colour ribbon is used, 1500 mono images can be produced. When printing is completed the finished CD-Rs/DVD-Rs are efficiently stacked. The CopyDisc 7P enables unattended operation to be confidently and reliably carried out.

CopyDisc 7P

Automatic CD-R/DVD-R Duplicator & Thermal Printer

Specifications

CD-R/DVD-R Capacity:	220 CD-Rs/DVD-Rs	
CD-R Throughput:	41 per hour (colour printing) with 7 writers (approx.) 62 per hour (mono printing) with 7 writers (approx.)
