## DLT Tape Master Degausser

To overcome the problems associated with using existing DLT tapes with the new DLT 1 tape drive, Verity Systems have introduced the new DLT Tape Master Degausser.

Anyone replacing their existing DLT drive with the new DLT1 drive should be aware that their existing DLT tapes will be unsuitable for use with the new drive. Formatted and previously written tapes will simply be ejected as incompatible media for the DLT1 tape drive.

The problem is easily solved by erasing all existing DLT tapes on Verity Systems' "DLT Tape Master Degausser". The DLT Tape Master will erase all old data and formats in 10 seconds leaving the tapes completely clear and ready to use in DLT1 drives.

### Specifications

- **Media Erased:**
  - Data**
  - DLT Tapes
  - 1/2" computer tape, Diskettes - single/boxed, QIC - DC 600, 2000, TK50, 70, 85, 3480/3490E/3590E, 4mm/8mm/ Exabyte/Travan, PC Hard Drives
