Easy to Operate

Imager Autoloader

Printing your own CD-Rs and DVD-Rs has never been faster and easier than with the new **Imager Autoloader**. The Imager Autoloader can automatically print 50 CDs or DVDs in one session.

Loading discs onto a manual CD printer can be a very time consuming process, especially if you need to print 50, 100 or more CDs at any one time. The new Imager Autoloader allows this process to be easily and inexpensively undertaken. The Conductor's precision robotics can move up to 50 discs into and out of your printer automatically.

*Imager Autoloader with
Imager Thermal CD/DVD Printer*

*Imager Autoloader with
ImagerPRO CD/DVD Printer*

The Imager Autoloader comes ready with a Verity Systems CD/DVD printer, allowing you to print text, graphics, logos and even full-colour photos directly onto the surface of the disc.

Easy to Operate: Proven Reliability

An efficient and user-friendly design streamlines all operations. Since most printing jobs are unattended, reliability has carefully been designed into Imager Autoloader. The "pick and place" mechanism greatly improves upon the reliability of other designs, assuring you non stop, high volume production. The rugged construction and styling of the Imager Autoloader makes it equally at home in office or production environments.

Two Printing Options

Both inkjet and thermal printers are available, so you can choose which one works best for you. Select the Imager IV CD colour printer for 1200 x 1200 dpi resolution, full-colour printing onto printable-surface discs. Choose the ImagerPRO for fast and incredible 2400 dpi, full colour printing. Or choose the Imager Thermal CD printer for durable, scratch and smudge resistant, completely waterproof printing onto standard discs.
