Ink-jet CD/DVD Printers

The *Imager IV* and *ImagerPRO* are the latest ink-jet CD/DVD colour printers from Verity Systems. With the 1200 dpi resolution of the Imager IV and the incredible 2400 dpi resolution of the new ImagerPRO, Imager printers are your best solution for virtually any optical disc printing job.

Imager printers let you create bright, vibrant, full-colour discs that reflect the professional image of your business!

Imager IV CD /DVD Inkjet Printer

ImagerPRO CD/DVD Inkjet Printer

If you utilise CD-R's or DVD-R's for recording and storing data, software, music and audio images, don't take chances with your disc labelling. Felt-tip markers can convey an unprofessional image and potentially damage your discs. Paper stick-on labels can be difficult to apply and can ruin expensive CD-R media and CD-ROM drives. However, with the Imager IV or ImagerPRO CD/DVD colour printers you can create colourful, customised CD-R/DVD-R designs onto printable-surface optical disc media at a price that is very affordable.

The Highest Resolution

Both printers utilise advanced technology that produces 1200 dpi – 1.44 million pixels per square inch or 2400 dpi – an amazing 2.88 million pixels per square inch. You can print full colour text, logos, graphics, photos and more with stunning clarity and detail in up to 16.7 million different colours. No matter what you're printing, the results will impress you and your customers.

And the quality does not come at the expense of speed. A typical full colour disc with 100% coverage at 1200 dpi, prints in just 132 seconds on the Imager IV. The ImagerPRO is also extremely fast, a full-colour disc with 100% coverage prints in just 60 seconds. So you'll be able to produce more discs per hour than ever before!

Print Onto Virtually Any Printable Surface CD-R

The Imager IV and ImagerPRO utilise a special ink formulation to deliver bright, bold and true photo-realistic colours. They also prints onto the widest variety of printable-surface media ever. Images are highly durable and on many brands of CD-R's dry immediately. Ink capacity is over twice that of other similar cartridges, offering longer print runs between cartridge changes and lower costs per printed disc. Also new is support of 58mm & 86mm CD-R business cards with the optional adapter kit available on both models, plus both have an optional Autoloader to load up to 50 discs per batch in and out of your Imager IV and ImagerPRO.
