

One of the Fastest CD Printers

610 X 305 dpi Print Resolution

5 Second Mono Print Time*

Standalone or Autoloader

Interchangeable Ribbons

Approx 1000 CD's per Mono Ribbon

Scratch & Smudge Resistant

Suitable For Any Environment

Cost Effective

Imager Thermal

The Imager Thermal CD printer offers an impressive range of features to anyone who duplicates CD-R's or other 120mm optical media such as CD-RW, DVD-R and DVD-RAM.

As one of the world's fastest CD printers the Imager Thermal keeps pace with even the most demanding production schedules. You can print high durable text and colourful graphics onto a wide variety of standard lacquer-surface media types, eliminating the need for special printable surface discs.

Imager Thermal CD/DVD Printer

Thermal CD/DVD Printer

If your music, video, software or data duplication requirements include printing onto CD-Rs, DVD-Rs or other optical media, the Imager Thermal CD/DVD printer has all the features you need – at a new, industry leading low price. You can print one or two colours using virtually any combination of text, graphics, logo, photo's or other artwork. Discs look so good, you'll think they were professionally silk-screened!

Print Resolution & Speed

At 610 x 305 dpi, the Imager Thermal is the highest-resolution thermal CD printer available. It is also very fast at just 5 to 10 seconds per disc of actual print time (depending upon print coverage and in monochrome print mode). The Imager Thermal keeps up with virtually any high volume, production printing task.

Durability of Images

Thermal transfer inks are highly scratch and smudge resistant and are completely waterproof. Cost per copy is also very affordable when compared to other printing methods.

Fast & Easy Ribbon Changes

The Imager Thermal is ideal for production environments, not only because of its speed and heavy duty construction, but also because its drop in ribbons are the fastest and easiest to change when compared to other thermal CD printers. You can even purchase an extra removable ribbon cartridge, allowing you to pre-load the next ribbon and "hot-swap" when a ribbon change is needed.
