up**

Automatic CD Business Card Sleever for Carton, Paper, Tyvek & Plastic Sleeves

The MEP120BC CD Business Card Sleever is designed as an easy-to-use bench-top unit capable of sleeving CD Business Cards and 8cm CD's in volumes more normally expected from expensive floor mounted models. It can handle over three thousand CD Business Card sleeves per hour with cost savings of around 80%. The MEP120BC can be quickly set up to deal with different types of sleeves - paper, plastic, tyvek or cardboard - a feature which will be attractive to operators needing to accommodate small runs in their programme.

The unit has an integral four digit counter, a selectable automatic stop after every set run of disks (adjustable from 0 -9999) and can also easily be set to process users' own spindles.

The MEP120BC provides a versatile, dependable and transportable CD Business Card and 8cm CD's sleeving unit at a price to meet the tightest of budget constraints, whilst the output of up to 55 CD's per minute means it can compete with the more expensive heavyweights.

MEP120BC

Automatic CD Business Card Sleever
