Matisse Gold Manual CD/DVD Printer

Manual CD/DVD Printer

The Matisse Gold offers ink-jet printing directly on to the surface of printable media. It features CopyTrax PPP™ (Precision Printing Protocol), ensuring perfect print positioning every time and comes with the graphics software DISCUS. Matisse Gold also comes with a precision "laser cut" caddie for accurate printing path under the print head.

The Matisse Gold is under constant development utilising the latest Epson print technology. The benefits also include no banding or streaking on print and a separate black ink cartridge for true black ink quality.

The Matisse Gold is a mid range CD printer which provides 2880 dpi high resolution with 4 colour "PHOTO" printing. This printer can print directly on to the surface of CDs, DVDs and CD Business Cards.

Both MAC & PC compatible, the Matisse Gold uses a rigid, laminated alloy double disc caddie which holds up to two CD-Rs during the printing process. This ensures that the CD-Rs are passed through the printer smoothly and accurately, allowing 2 CDs to be printed one after the other.

The Matisse Gold is ideal for those wanting to produce small quantities of CD-Rs and used in conjunction with a Verity Systems CD-R duplicator enables users to produce their CDs in house.
