

High Energy Security Conveyor Degausser

For volume erasure of high-density metal tapes and cassettes, the SV5000's performance will satisfy the requirements. Automatically controlled by an electric eye the reels, disks or cassettes are placed onto the wide conveyor belt where they are transported through the 4000 Gauss field. Up to five thousand diskettes or five hundred VHS cassettes can be erased per hour. The SV5000 has been specifically designed to meet exacting performance criteria demanded and expected by security operations requiring safe, effective and secure management of their magnetic media. The SV5000 meets the SEAP (Security Assessment Panel) specifications and is suitable for the secure erasure and destruction of data stored on magnetic media up to "Top Secret" status.

Features:

- ★ Conveyor system
- ★ High media throughput
- ★ Erases reels, cassettes and cartridges
